

# RSuite

## DATA FUSION

Complex Search Capabilities

Utilize Built-in Report Templates

Manage Role-based Access Controls

Publish into Multiple Formats

## Revolutionary Content Exploitation

---

RSuite® Data Fusion is a collection of applications for analysis, situational awareness, and intelligence production. It contains multiple integrated Web-based applications and analytics that are capable of operating in D/DIL environments.

RSuite Data Fusion is highly scalable and can be deployed in environments from large enterprise clusters down to a single laptop.

## SOFTWARE FEATURES

---

- » Manage role-based and attribute-level access controls across all applications and data.
- » Unlock data held in any application or data store with the Olap Cube toolset to undertake complex, powerful analysis using an easy to use, drag and drop interface.
- » Utilize Keyword and Boolean searches along with advanced semantic search capabilities to enhance search functionalities.
- » Capture disclosure guidance as templates and apply them to multi-media and final work products to ensure compliance before distributing to third parties.
- » Experience a built-in report template creator which allows users to create whatever standard reports are needed to simplify the reporting effort.
- » Use the link analysis tool with advanced suggested entities graph generation to reduce workloads.
- » Search by location across the entire data set with a built-in map visualization tool. RSDF offers its own map set while also providing integration to ESRI.
- » Utilize automatic data replication across the entire enterprise.
- » Utilize the integrated Natural Language Processing tool (NLP) to automatically identify entities and their relationships across multiple languages.

RSuite Data Fusion makes use of the MarkLogic enterprise NoSQL platform to provide storage, indexing, and application services, and data synchronization.

» **The RSuite Data Fusion solution was built using a modular, open standards approach in which each component can be swapped in or out based on the needs of the users or existing customer technology.**

## BENEFITS OF USING OUR SOFTWARE & SOLUTIONS

---

Contiem's software has a global user community that works with our product development team to improve our products. Our user base plays a critical role in shaping the way we upgrade and maintain our software.

All RSuite users have access to a 24/7 Customer Support portal with product documentation and support.
