Help Authoring Made Easy

HelpStudio is the fastest, easiest way to create and publish procedures, documentation, and help systems and integrate them with your desktop, web, or mobile applications or components.

Generate output in cross-platform Web Help, automatically responsive for tablet and mobile, or printable PDF. Built in localization support means that you can take your help system to a global audience if required.

HelpStudio combines a feature-packed WYSIWYG authoring environment, HTML-based layout templates, and customizable content widgets to simply create and localize consistent, professional-looking help systems with minimum effort.

SOFTWARE FEATURES

- » Deliver dynamic content using pre-defined widgets.
- » Offer a variety of functionality for creation, management, and application of styles built around web standard CSS.
- » Author functionality with page map, table editing, unlimited undo, hyperlink designer, and build flag highlighting.
- » Provide full unicode support including Japanese, Chinese, and Korean alphabets or special characters.
- » Import content from a variety of formats, including Microsoft Word, Adobe RoboHelp, or plain HTML files.
- » Reference source content that is managed outside a HelpStudio Project with the External Content Sources functionality.
- » Create any number of PDF Booklets.
- » Automatically refresh external content managed outside a HelpStudio project in preview or build mode.
- » Create properties containing information that can be used in Topic Content, Topic Titles or Table of Contents.
- » Create multiple outputs from a single project source.

HelpStudio is the natural choice for authoring end-user help to accompany a desktop application, comprise a website help system, or provide a procedural manual.

» **Includes a complete suite of conceptual help authoring support tools to generate output in cross-platform, Web Help, automatically responsive for tablet and mobile, or printable PDF.**
