congility

Intelligent Content, Delivered Smarter

Congility is a suite of products that help major industry players collate, propagate, and distribute content. Included in the suite are the Congility Content Server, Congility Mobile, and Congility Portal.

Congility provides solutions for the publishing and intelligent delivery of structured content. With many years of experience in XML content technologies, our solutions enhance the customer experience by maximising the agility of content delivery.

Whilst every dynamic delivery implementation has the same primary objective – delivering content to audiences – the focus of each is different. Congility addresses this by offering different entry points into the Congility platform.

SOFTWARE FEATURES

Congility Content Server

- Publish DITA, non-DITA, and legacy files for delivery to browsers and mobile devices.
- Integrate with external source systems such as CCMS and SharePoint.
- Powerful searching of metadata enables dynamic content solutions.
 - Centralize and scale enterprise content easily.

Congility Portal

- Responsive portal that supports collections, notes, feedback.
- Implement customer-specific features using standard JavaScript frameworks.
- Record user interactions (such as acknowledging time-critical bulletins) and reporting portal activity.

Congility Mobile

- Deliver technical content to native iOS and Android apps.
- Provide content synchronization to allow users to take latest content offline.
- Enables technicians to access content when network connections are unavailable.

The Congility platform can have standard delivery functionality, can have customized features, or provide a Content-as-a-Service framework to develop your own custom solutions.

Congility offers a responsive web[]based portal, mobile apps for Windows, MacOS, Linux, Android, and iOS, and the ability to integrate with other business systems.

BENEFITS OF USING OUR SOFTWARE & SOLUTIONS

Contiem has a global user community who work with our product development team to improve our products. Our user base plays a critical role in shaping the way we upgrade and maintain our products.

All Contiem clients have access to our help desk portal with product documentation and support.
