

# Document! X

Automated Authoring Tools

Generate Object Model Diagrams

Single-Source Build and Publish

Customizable Outputs

## Software Documentation Made Easy

---

Document! X is a combination of an automated documentation tool and a full authoring environment which can be used to create, publish and maintain accurate, professional quality documentation for .NET, Web Services, Databases, XSD Schemas, COM Components and Type Libraries, Java and Javascript.

Document! X is not just an automated documentation build tool – it includes a fully-featured documentation authoring environment allowing you to supplement the automatically generated content where required.

All of the Document! X templates are fully customizable and can be easily adapted or extended to meet your specific requirements.

## SOFTWARE FEATURES

---

- » Combine automated documentation with generation with a full WYSIWYG authoring environment.
- » Use existing source code comments and extend the source content outside of the source with the rich authoring environment provided.
- » Form a comprehensive documentation set to cover resource groups, operations, requests, responses and parameters.
- » Use the Visual Comment Editor & Visual Studio Integration for documentation template styles for .NET and COM.
- » Adapt existing templates to match existing corporate style and colors.
- » Customize Table of Contents definitions.
- » Fine tune the standard phrases and terminology used by Document! X to match your standards.
- » Create in-line or linked examples with the Example Code Designer and example code is automatically colorized in the generated output.
- » Support several different languages (English, French, German, Dutch, Italian, and Russian) for the phrases used in the generated output.
- » Author content for multiple languages within a single project with embedded tip for primary locale content.

**Document! X templates are fully customizable and can be easily adapted or extended to meet specific requirements.**

**Generate professional, accurate, and up-to-date reference documentation for .NET assemblies, COM components and type libraries, web APIs and services, Java projects, databases (Access, SQL Server, Oracle, OLE DB), XSD schemas, and JavaScript.**

## BENEFITS OF USING OUR SOFTWARE & SOLUTIONS

---

Contiem has a global user community who work with our product development team to improve our products. Our user base plays a critical role in shaping the way we upgrade and maintain our products.

All Contiem clients have access to our help desk portal with product documentation and support.
