

RSuite® CCMS – Powering the world’s most complex publishing operations

RSuite enables organizations to manage and publish high-value content with speed, accuracy, and efficiency. Built on MarkLogic’s NoSQL database and trusted globally, RSuite is available as a SaaS cloud service or on-premises deployment.

Key Benefits

Accelerate Publishing Workflows – Automate authoring, review, and approval processes to reduce time to market

Lower Costs – Reduce errors, duplicated effort, and overall content volume through component reuse

Compliance Guaranteed – Protect high-value content with role-based access control and built-in governance

Seamless Integration – Connect RSuite to existing systems via APIs and plug-ins

Deployment Flexibility – Choose SaaS cloud for speed and scalability or on-premises for maximum control

Key Features

Content Management

- Create, modify, access, version, link, and publish content at the component level
- Protect content with role-based access and audit trails
- Manage XML, semantic models, and multimedia assets in one platform

Workflow Automation

- Assign, track, and automate editorial and approval workflows
- Customize dashboards with saved searches, notes, and task lists
- Automate backups and disaster recovery (SaaS deployment)

Integration & Extensibility

- Use out-of-the-box and industry-standard APIs
- Extend with plug-ins and custom models for specialized workflows
- Integrate with enterprise systems (databases, DAMs, publishing tools)

Publishing & Delivery

- Publish from a single XML source to multiple formats (print, digital, content delivery platforms)
- Deploy custom stylesheets for consistent multi-channel outputs
- Repurpose content quickly for new markets and products

Deployment Options

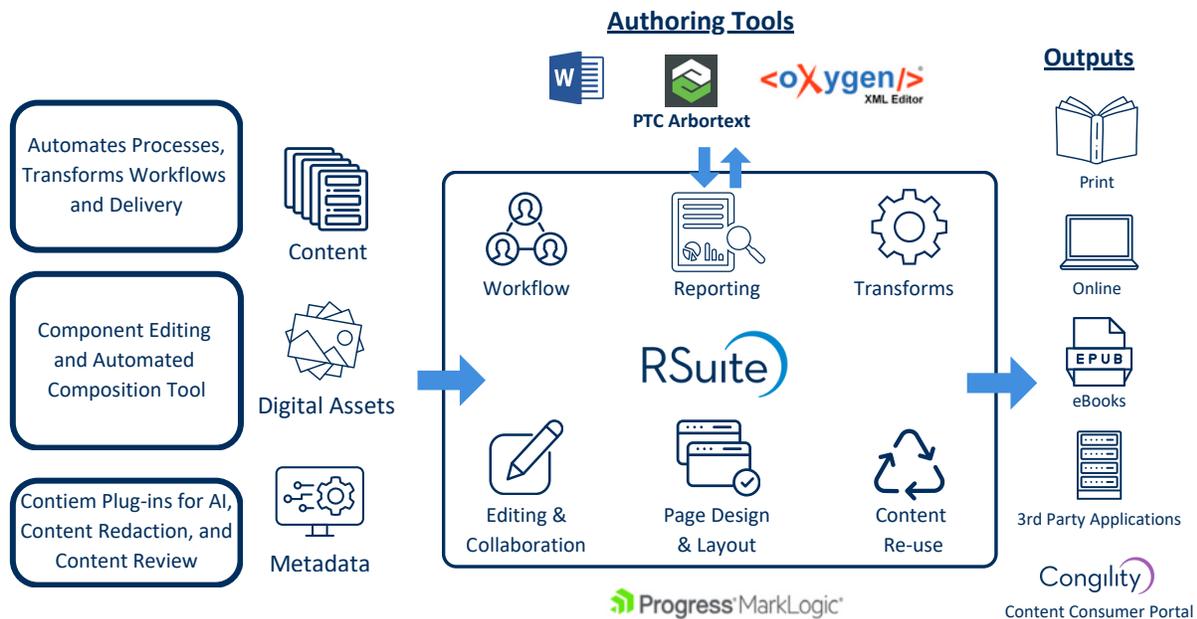

RSuite is available as:

- SaaS (Cloud) – Fast, scalable, with automated backups and reduced IT overhead.
- On-Premises – Full control, integration with existing clustered or enterprise systems.

Professional Services

RSuite is backed by Contiem’s Professional Services team including:

- **IT Integration** – Deploy RSuite on-premises or in customer cloud environments (Azure, AWS, private cloud). Integrate with single sign-on security, enterprise email, and role-based governance models.
- **Enterprise Integration** – Configure RSuite to operate with third-party applications and services via open, well-documented APIs (XML/JSON). Connect RSuite workflows directly to external systems for automation.
- **Content Engineering** – Implement industry-standard DTDs, build XSLT transforms, and ingest legacy content with batch scripts or MarkLogic Content Pump.
- **Workflow Automation** – Customize workflows to support internal and external users, automate notifications, and streamline delivery to printers, courseware publishers, and other partners.
- **Custom User Interfaces & Reporting** – Extend RSuite with organization-specific dashboards, UI features, and reports tailored to unique business needs.

Optional Plug-ins

Extend RSuite with optional plug-ins designed to address specialized publishing and compliance needs:

- **RSuite Redaction** – Automatically redact PII and sensitive information to protect confidentiality and meet regulatory requirements.
- **RSuiteAI** – Generate structured content using AI trained on your organization’s repository, accelerating authoring and reuse.
- **RSuite Review** – Support peer-reviewed content workflows, including standards development and journal publications.
